

FIRE EXTINGUISHER USING CISCO PACKET TRACER

Fire Extinguisher project is done using the cisco packet tracer. Cisco packet tracer is a network simulation tool . This project is used to control the fire and to activate the sprinkler when there is smoke detected beyond the range specified.

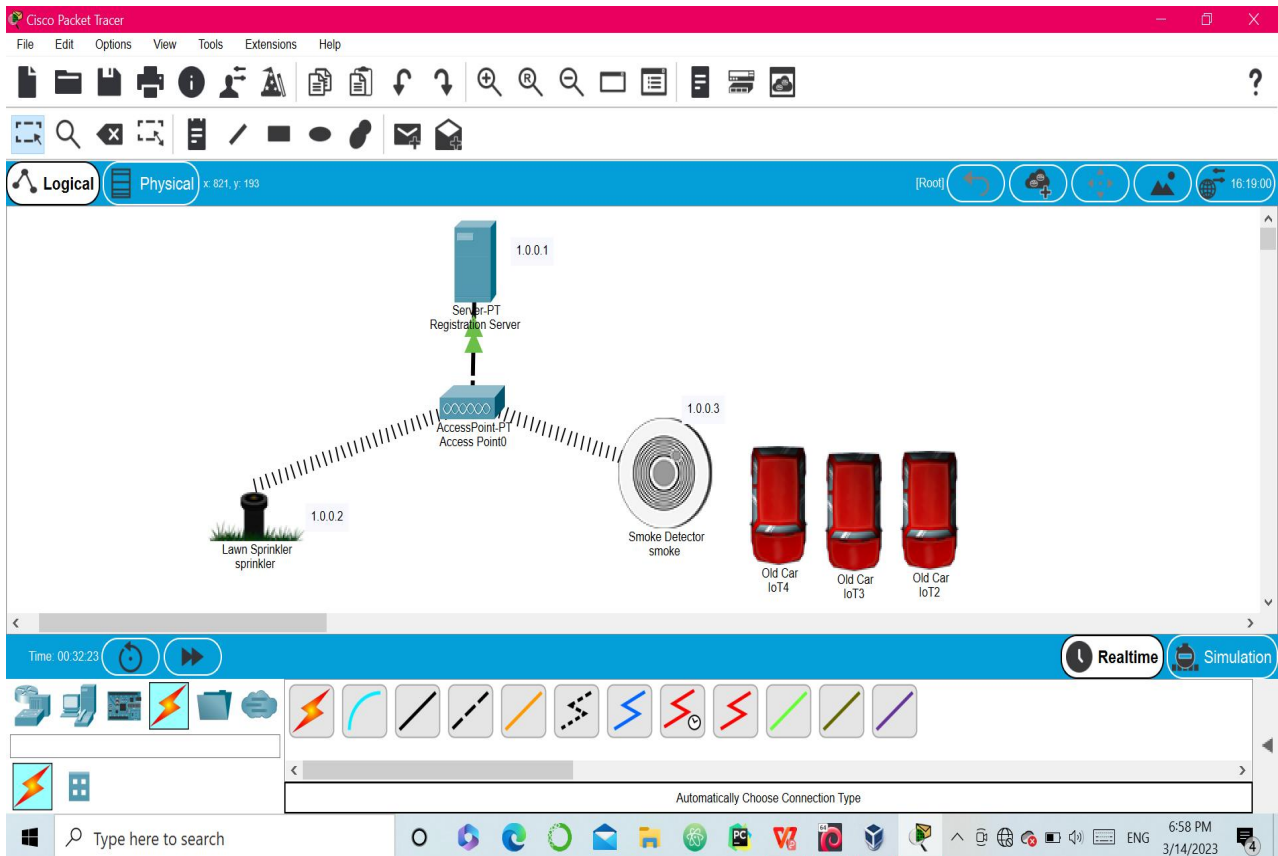

To implement this we required mainly 4 components the are a server, water sprinkler, smoke detector , and 3 cars that emits the smoke.

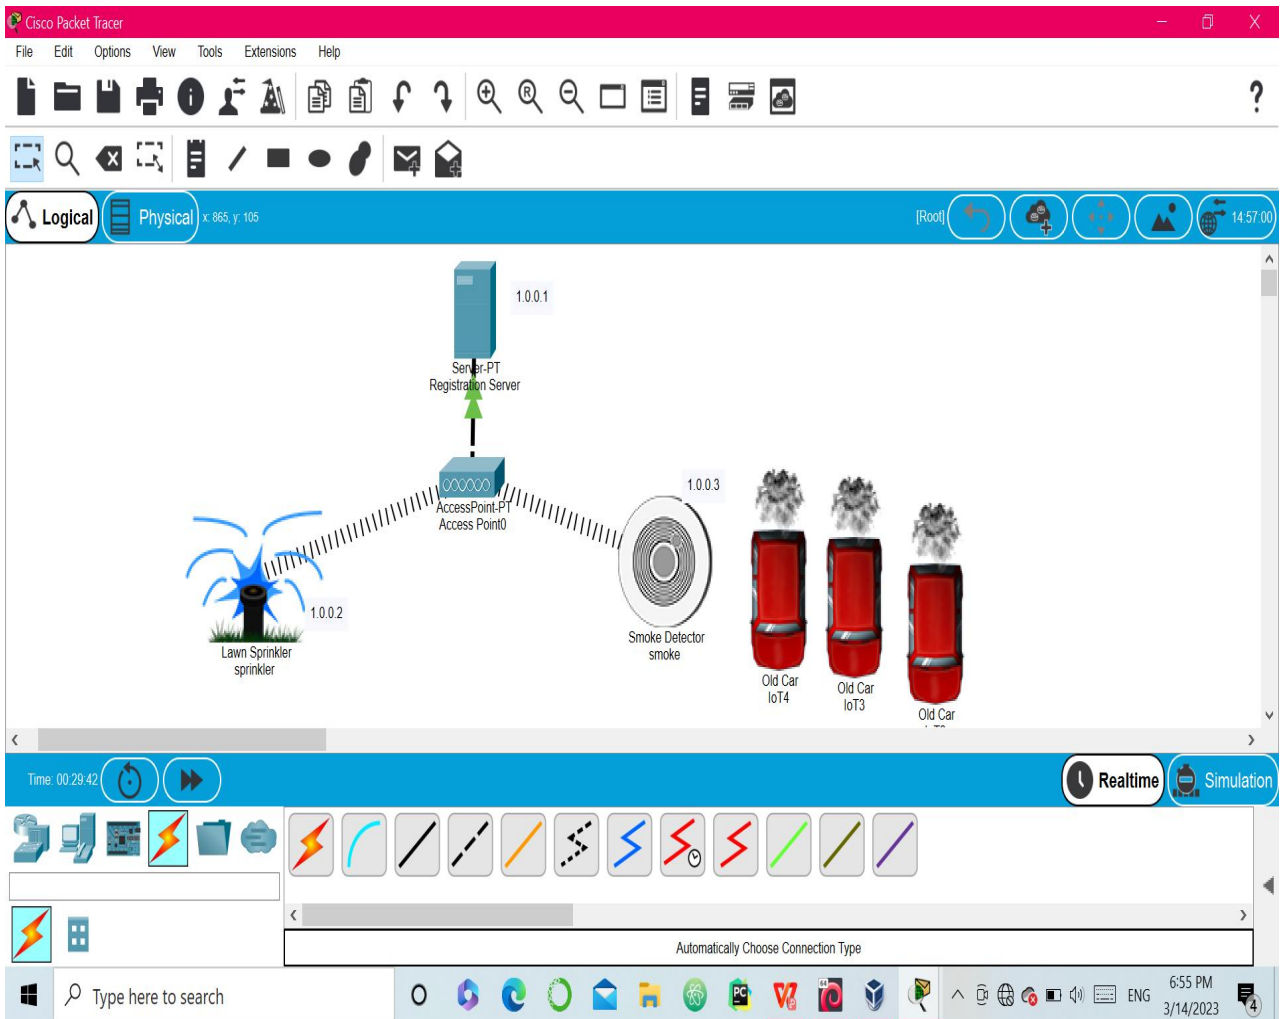

STEPS:

- Drag and Drop Server pt,Access point,Smoke detector,lawn sprinkler sprinkler,old car-3.
- Rename Server pt as *"Registration Server"* and Rename lawn sprinkler sprinkler as *"lawn sprinkler IOT-0"*.
- Double click on Access point and select config then select port1 and write *"SSIO"* inplace of CISCO .
- Double click on server and select desktop then select IP config then select *"static"* & also write IPv4 as *"1.0.0.1"*• Double click on Smoke detector and select config then select wireless0 and write *"SSIO"* inplace of CISCO & also select IP config as *"static"* and IPV4 as *"1.0.0.2"*.
- Double click on Sprinkler and select config then select wireless0 and write *"SSIO"* inplace of CISCO & also select IP config as *"static"* and IPV4 as *"1.0.0.3"*
- Now connect access point to registration server using symbol
- Double click on Sprinkler and select settings and then select Remote Server and write server address as *"1.0.0.1"* ,username:*"admin"* & password :*"admin"*and press *connect*.
- Double click on Smokedetector and select config and then select settings and then select Remote Server and write server address as *"1.0.0.1"* , username : *"admin"* & password :*"admin"* and press *connect*.
- Add IPaddress for Registration Server as *"1.0.0.1"*,Smoke detector as *"1.0.0.2"* & Lawn sprinkler IOT-0 as *"1.0.0.3"* .• Now double click on Registration server and select services and select IOT and select *"on"*.
- Now double click on Registration server and select Desktop and select web browser and in url type as *"1.0.0.1"* and press go.
- Now select *"signup"* and type username & password as *"admin"* then press *create*.
- Select *"conditions"* and select add and type name as *"smoke on"* and then set the level as *">=0.4"* and select sprinkler status *"true"* and then press ok.
- Select *"conditions"* and select add and type name as *"smoke off"* and then set the level as *"<=0.4"* and select sprinkler

status "*false*" and then press ok.

- Now done with establishing connection . To obtain the smoke press ALT+car.
